Summary

I'm an iOS developer with four years of experience in software development industry. I specialize in building high-performance applications aligned with the latest iOS technology trends. I'm experienced in integrating AI solutions in iOS apps and skilled in developing real-time communication features for seamless, live user interactions. I prioritize writing code that is easy to read and maintain.

Relative Skills

- Extensive skills in Swift programming language and SDK usage
- Proficient in testing and ensuring the quality of production-level applications.
- Solid understanding of working with REST APIs for seamless data integration.
- Familiarity with socket.io and WebRTC technologies for real-time communication
- Experienced in integrating AI solutions in iOS APP.
- Expertise in utilizing Core ML, Core Animation, Core Graphics, and other ios tools.
- Strong appreciation for creating intuitive and visually appealing user interfaces (UI/UX).
- Experienced in developing cross-platform apps using Flutter.
- Knowledgeable in Python, particularly in frameworks like Django, FastAPI, and Flask.

Other Skills

Swift, Objective-C, Dart, python, C++, ReactJS, Flask, Django, fastAPI, HTML, CSS, Adobe Creatives

Work Experience

Current	iOS Developer Seekr
	iOS Developer Kotha Apps & Technologies Ltd
	Co-founder & Game Developer WhiteLabel Games
	Co-founder & VP Product AuctionVilla OÜ
	iOS Developer Nougat Technologies,Tanzania
	Game Developer NCI Gaming

Professional Projects

Seekr **Link:** https://apps.apple.com/us/app/seekr-ai/id6470461667

Description: Seekr is a platform Which is working for the low sight people.
I implemented AI based solution for visually impaired people using ultralytics
Yolov8 Model and Vision framework.

Kotha **Link:** https://apps.apple.com/us/app/kotha/id1188060798

Description: At Kotha, a Social Communication and Lifestyle app, I worked as an
iOS developer. In this app I implemented realtime audio and video calling feature
using Webrtc and also implemented realtime messaging using Socket.IO. In this app
I have also implemented a social marketplace for buying and selling digital product
across the app users.

WhiteLabel Games **Link:** https://playwhitelabel.com

Description: As a co-founder of Whitelabel Game, a marketing-focused Advergame
development company, I played an integral role in establishing and shaping the
business. Additionally, I worked directly as a game developer, utilizing Construct3,
CreateJS, and Javascript frameworks to develop captivating games.

AuctionVilla OÜ **Link:** https://auctionvilla.io/

Description: Actionvilla is a distinguished Digital Assets Marketplace in Estonia,
specializing in the buying and selling of mobile application ownership. As a
co-founder of the company, I played a crucial role in establishing and shaping
the business from its inception. Additionally, I served as a product engineer, actively
involved in developing and refining our platform.

Sokoni Kwetu **Link:** https://apps.apple.com/us/app/sokoni-kwetu/id1482431769

Description: I developed, published, and maintained Sokoni Kwetu, an E-Commerce
app designed to simplify people's lives. This app was built using Swift and integrated
with various technologies, including Firebase Authentication, Firebase Firestore, and
RestAPIs. To enhance functionality, I incorporated third-party libraries such as
Alamofire and Realm. Furthermore. As the sole developer and publisher, I took
full ownership of the project, driving its successful development and ongoing
maintenance.

Mackspice **Link:** https://apps.apple.com/us/app/mackspice/id1590196517

Description: Mackspice is a sustainable spice farming and production brand that sells
high-quality spice produced by its rural smallholder farmers, empowering them to take
control of their own lives.
I successfully developed the iOS app, ensuring its seamless functionality, intuitive user
experience, and robust performance.

Education

Undergraduate in Computer Science and Engineering at NorthSouth University
